Reasons for Allowance

Applicant's arguments, see Remarks, pages 3-5, filed 10/27/08 and declaration under 37 C.F.R. 1,132, with respect to claims 1-3, 5-8 have been fully considered and are persuasive. Consequently, the 103 rejections of claims 1-3, 5-7 have been withdrawn.

Applicant's amendment has overcome the claims objection. Consequently, the said claims objection is withdrawn.

The following is an examiner's statement of reasons for allowance: The examiner has found claims 1-3 and 5-8 to be unobvious over the prior art of record and therefore to be allowable over the prior art of record. The present invention relates to a method for producing ascopyrone P, which comprises heating an aqueous solution of 1,5-D-anhydrofructose at a pH of 2 to less than 7 and a temperature of 100°C or higher. The relative prior art documents do not teach or suggest making the ascopyrone P at the claimed pH and temperature, nor is the claimed method obvious over the prior art. Furthermore, Applicant's declaration demonstrates that the method of the present invention, which is carried out at a pH of 2 to less than 7 and a temperature of 100°C or higher, produces Ascopyrone P at a high yield of more than 25 % in a short period of time, for example, 5 minute, whereas at under other conditions low yield is produced in a short period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
